## OUR TEACHING METHODS

Research shows people learn best when they can put the learning into practice, discuss what they're learning and interact with their peers.

For that reason, we emphasise active learning through tutorials and workshops, scaffolded by short, sharp lectures. These will be delivered online, at time that suit busy people. There will also be some face-to-face workshops but with the option of online participation.

We recognise that many students may not have been in a classroom for some years. But don't worry; you'll have access to study tutors who can show you the academic ropes and help you do your best work. We'll also provide carefully selected, highly relevant readings and record all the lectures so you can review and catch up as necessary.
